**EVA Airways Successfully Implements Jouve's Engineering Solution
For its Aircraft Maintenance Operation**

IRVINE, CA – September 20, 2006 – Jouve Aviation Solutions (JAS), the leading provider for complete end-to-end solutions for airline technical data, and EVA Airways announced today the completion of a successful roll out of Jouve's AirGTI[®] solution into EVA's maintenance and engineering operation.

"This was a very smooth implementation," stated Ping-Che (Arthur) Lu, Manager, Evergreen Aviation Technology Corporation (EGAT), EVA's maintenance operations arm. "The EGAT and Jouve teams worked together in successfully integrating the Jouve's engineering solution into EVA's in-house maintenance system."

Integrated with EVA's MEMIS-AMOS system, Jouve's solution enables EVA's aircraft maintenance planners to generate routine work packages that are complete, accurate and specific to aircraft configuration and tail number. Over a period of one year, EVA had successfully implemented Jouve's technical publications solution to manage maintenance manuals, task cards and maintenance programs for the airline's B777, B747-400 and MD-11 fleets. This solution leverages AirGTI's technologies for OEM revision and all technical publication needs, thus providing a direct link to the most current version of maintenance manual text and graphics for job cards and work packages.

"EVA is now realizing a 50% increase in the efficiency of generating new job cards using the AirGTI products," stated Jyn-Jaan (J.J.) Ho, Manager Engineering Department at EVA. "This has translated into cost savings, process improvement and better accuracy within our maintenance and engineering operation."

"EVA has provided us a great opportunity to deliver our airline-specific solutions into its unique aircraft maintenance environment with seamless results," stated Geoffrey Godet, JAS President. "We are very proud of the efforts put forth by our Jouve staff and the strong relationship that has formulated with EVA, our first Asian customer."

ABOUT EVA AIRWAYS

Based in Taipei, Taiwan, EVA Airways provides regularly scheduled passenger and cargo service to major cities in Asia, Europe, and the Americas. EVA has a fleet of 43 wide body aircraft and is a wholly owned subsidiary of Evergreen Marine Corporation. Its fleet is maintained by Evergreen Aviation Technologies Corporation.

ABOUT JOUVE AVIATION SOLUTIONS

AirGTI is not just a computer system, but represents a way of doing aeronautical business and has simplified the way that aviation publications are managed. By gaining control of its data, an operator can increase productivity and reduce the cost of change management. Maintaining the quality, accuracy, and reliability of data are essential in the achievement of operational excellence. In today's value-conscious environment where we must do "more with less" in a method faster and better than the competition, a comprehensive data integrity management solution is imperative. The AirGTI Suite and AirGTI Services provide this by merging specialized knowledge and experience with airline business process automation and technology. The synergy that results from this combination is what makes the AirGTI solution so powerful, unique, and valuable. Its functions and features are designed to provide cost reduction, control and increase processing efficiency through an integrated change management and paperless strategy. JAS currently provides digital publication services to 25 major airline and aerospace OEM customers on five different continents. Over 40,000 airline maintenance technicians now rely on Jouve AirGTI technology for access to critical repair and maintenance information. For more information on JAS, please visit www.jouve.com.
