**Evergreen International Awards Contract to Jouve to  
Provide Electronic Task Card System**

IRVINE, CA – September 8, 2006 – Jouve Aviation Solutions announced today a contract award from Evergreen International Airlines to provide a job card system to support the cargo carrier’s maintenance and engineering operations. Jouve’s AirGTI® Task Manager will manage Evergreen’s task cards and technical documents for Boeing’s fleet of modified tail hinged cargo B747-400 LCF aircraft designed to carry the Boeing 787 fuselage as well as its existing 13 B747-100/200 aircraft.

“We wanted a full service electronic job card solution that would ensure our users have the most up-to-date and accurate information at all times,” stated David Heath, Evergreen’s Director of Engineering. “We also looked for a proven solution that would meet our technical and schedule requirements.”

AirGTI Task Manager will enable Evergreen to manage their existing B747-100/200 task card data along with the B747-400 LCF in one system, one format and one process. This will extend the process to build and release task card packages to production while decreasing the requirement for two separate systems, with differing data formats and outputs.

AirGTI Task Manager is a full-featured job card software application designed for maintenance planners to produce work card packages that are complete, accurate and specific to aircraft configuration and tail numbers. Task Manager can be linked directly to the manufacturer’s AMM text and graphics, thus allowing integration of the updates without the need to re-key or cut and paste graphics. Task Manager also permits users to use their favorite word processors and graphics editors to modify text and graphics.

“We look forward to building a strong and longlasting partnership with Evergreen,” stated Jouve President Geoffrey Godet, “and to help them achieve not only immediate productivity gains, but also long term benefits in the future.”

Airlines around the globe have integrated Jouve’s Task Manager system into their unique aircraft maintenance environments, realizing a significant increase in the efficiency of generating new job cards. This has translated into cost savings, process improvement and better accuracy within airline maintenance and engineering operations.

## **ABOUT JOUVE AVIATION SOLUTIONS**

AirGTI is not just a computer system, but represents a way of doing aeronautical business and has simplified the way that aviation publications are managed. By gaining control of its data, an operator can increase productivity and reduce the cost of change management. Maintaining the quality, accuracy, and reliability of data are essential in the achievement of operational excellence. In today's value-conscious environment where we must do "more with less" in a method faster and better than the competition, a comprehensive data integrity management solution is imperative. The AirGTI Suite and AirGTI Services provide this by merging specialized knowledge and experience with airline business process automation and technology. The synergy that results from this combination is what makes the AirGTI solution so powerful, unique, and valuable. Its functions and features are designed to provide cost reduction, control and increase processing efficiency through an integrated change management and paperless strategy. JAS currently provides digital publication services to 25 major airline and aerospace OEM customers on five different continents. Over 40,000 airline maintenance technicians now rely on Jouve AirGTI technology for access to critical repair and maintenance information. For more information on JAS, please visit [www.jouve.com](http://www.jouve.com).

## **ABOUT EVERGREEN INTERNATIONAL AIRLINES**

Evergreen International Airlines has been performing passenger and cargo service around the globe for more than 40 years. Worldwide operating authority, a network of global offices and affiliations allow Evergreen to handle any customer requirements.

Evergreen's fleet consists of both nose and side door loading Boeing 747Fs. With nearly a half million hours of Boeing 747 experience, Evergreen has established a reputation as a leading full service cargo operator with a performance record second to none.
