JAMA selects InfoTrust for EMC Documentum Content Management Solution

SUPERIOR, CO, USA – February 1, 2008 – InfoTrust Group announced today that the Journal of the American Medical Association (JAMA) has selected InfoTrust for its EMC Documentum content management solution. The project is a phased implementation of a workflow and content management solution for JAMA and Archives Journals.

“We look forward to working with the InfoTrust team on this important project. We selected InfoTrust not only for their proven technical skills, but also because we were impressed with the quality of their people,” stated Catherine D DeAngelis, MD, MPH, Editor in Chief, JAMA and the Archives Journals.

Initial implementation will be the management of editorial content from acceptance forward through publishing of content online and print. Editorial content will include issue-related print and electronic content for all 10 journals. The project also includes the management of supplementary editorial content, such as Website home pages, Continuing Medical Education, graphics, Instructions for Authors, authorship forms and permissions, Web help system content, and other Web-only content. Also included in this initial phase is post-publication content and information, such as corrections, international editions, reprints/e-prints, abstract re-publication, and books.

JAMA’s content has evolved over the past three years to include audio commentary through the use of podcasts and MP3 files. Digital data delivery to thousands of subscribers has prompted JAMA to increase their technology infrastructure and streamline their business processes. Leveraging technologies for collaboration and content management of digital assets will provide JAMA with increased control of schedule driven and time sensitive publishing.

“We are delighted to announce our new relationship with the Journal of the American Medical Association (JAMA),” stated InfoTrust Group CEO Geoffrey Godet. “This project supports our continued growth in the professional publishing industry and partnership with EMC Documentum.”

ABOUT JAMA

JAMA, published continuously since 1883, is an international peer-reviewed general medical journal published 48 times per year. JAMA is the most widely circulated medical journal in the world. JAMA is

published in multiple international editions and languages; the online version is made freely available to institutions in developing countries. JAMA's impact factor is 23.2 (the impact factor is a measure of citation rate per article, and is calculated by dividing 1 year's worth of citations to a journal's articles published in the previous two years by the number of major articles [eg, research papers, reviews] published by that journal in those two years). JAMA's acceptance rate is approximately 8% of the nearly 6,000 solicited and unsolicited manuscripts it receives annually; its average time from submission to publication is 124 days and average time from receipt to rejection is nine days. (For additional information, see the JAMA online) The Editor-in-Chief of JAMA is Catherine DeAngelis, MD, MPH.

ABOUT INFOTRUST GROUP

InfoTrust Group's business strategy and vision are focused on one common goal -- *customer oriented provider of leading application technologies and services for publishing and content management needs*. InfoTrust Group offers optimum customer satisfaction through a global support network of seven locations across the U.S., Europe and Asia to ensure your success by maintaining 24/7 customer service and support. We deliver powerful documentation solutions to over 100 companies in the following industries: Aerospace, Defense, Manufacturing, Automotive, High-Tech, Publishing and Health Care.

InfoTrust Group (formerly Jouve Aviation Solutions) has been a key player in the information processing industry for more than 25 years.
