### **InfoTrust and Mark Logic partner to deliver innovative solutions for the Aerospace industry**

InfoTrust, Inc. and Mark Logic Corporation form a partnership geared towards taking airline Maintenance, Engineering, and Flight Operations technical publications systems into the new generation. Using the MarkLogic Server, InfoTrust has released a new version of its FlightLine™ product to provide operational efficiency and functionality unavailable in competitor's products. Support for S1000D, 'point and click' reuse of existing content to create new publications such as Job Cards and internal manuals, and publishing to Electronic Flight Bag (EFB) devices are some of the functions facilitated by the new partnership. With this new functionality, FlightLine™ now supports publishing to multiple channels that include (PDF, Web Portals, standalone CD for remote unconnected repair stations, and EFB devices). Furthermore, using MarkLogic Server, FlightLine™ now provides an intelligent search mechanism that far exceeds traditional full-text search functionality provided by other products. Rather than fast access to too much unrelated data for the task at hand, the new search capability allows the user to easily aggregate data from across all the content, filter it for the task at hand and specific aircraft being worked on, and generate a single instance of all the data required to perform the task. The operational efficiencies achieved by the new functionality is designed to reduce the time it takes to service an aircraft, returning it to revenue generating duty sooner. For a demonstration of FlightLine's™ new EFB functionality that highlights the new intelligent search functionality, see <http://www.infotrustgroup.com/products/FlightLine.html>

August 2006, 3 new airline customers and 1 new OEM customer have selected InfoTrust for their Maintenance, Engineering, and Flight operations Technical Publication needs.

#### **About InfoTrust**

InfoTrust is an innovative solution provider of enterprise Maintenance, Repair, Overhaul and Flight Operations content management solutions for the commercial aerospace market with its FlightLine™ software solutions installed in many sites around the world. InfoTrust has over 10 years of experience

successfully supporting the needs of commercial airlines and repair facilities with integrated products and services that save time, cost and boost maintenance performance. Headquartered in Superior, Colorado, InfoTrust also has offices in San Diego, California. For further information about the company and its product suite, visit [www.infotrustgroup.com](http://www.infotrustgroup.com).

### **About Mark Logic**

Mark Logic Corporation is the provider of the industry's leading XML content server. Mark Logic works with providers of information products to accelerate new product creation, deliver products through multiple channels, integrate content from different sources, repurpose content into multiple products, build custom publishing systems, and mine content to find previously undiscovered information. MarkLogic Server does this by enabling companies to query, manipulate, and render XML content using the W3C-standard XQuery language. Designed for high performance and scalability, MarkLogic Server can deliver millisecond response times against multi-terabyte contentbases. Mark Logic is privately held and backed by Sequoia Capital and Lehman Brothers. For more information, please visit [www.marklogic.com](http://www.marklogic.com).
