**Mobideo Aerospace and InfoTrust Group-Defense Announce Partnership**

IRVINE, CA – March 13, 2008 – InfoTrust Group, Inc., formerly Jouve Aviation Solutions, and Mobideo Aerospace announced today the signing of a landmark partnership agreement. According to the agreement, the Defense Business Unit of InfoTrust Group and Mobideo will provide integration between the InfoTrust Group suite of XML and SGML content management tools and Interactive Electronic Technical Manual (IETM) with the Mobideo Guide™, a mobile MRO knowledge and monitoring system. This agreement also provides for joint marketing and global support of the combined solution.

The solution merges InfoTrust Group’s SkySuite products for authoring, change management, publishing and delivery of aircraft and weapons systems’ technical data and Mobideo’s Guide™ system designed to deliver up-to-date technical information and work assignments to maintenance personnel at the point of service.

“The combined technologies and core strengths of InfoTrust and Mobideo bring the benefits of complex electronic data management systems directly to the hangar floor and tarmac, where aircraft maintenance is performed,” stated Yaron Eppel, CEO of Mobideo. “By teaming up with a leader like InfoTrust, together we are able to provide a best-of-class solution that will increase workforce efficiency, reduce human error, improve on aircraft safety, readiness and availability and ultimately lower overall operational costs.”

“InfoTrust Group is always looking for ways to collaborate with other forward thinking entities for ways to improve maintenance operations,” said InfoTrust Group CEO Geoffrey Godet. “Our partnering with Mobideo gives us a unique opportunity to pool our expertise and place real-time, critical information into the hands of the aircraft field technician via wireless connectivity.”

“This is a giant leap forward for putting the most current service and repair data into the hands of the aircraft maintainer,” proclaimed Terry McNicholas, InfoTrust Group Executive Vice President. He explained that this is the defense industry’s first proven and practical collaboration to deliver a complete set of tools, ranging from back office authoring, updating and publishing of technical data to delivery of actual repair and task information into the hands of the shop and line mechanics. It further provides the monitoring and guidance of those tasks for production control levels that vastly improve aircraft readiness.

InfoTrust Group offers a single system that provides a complete information management environment across an entire maintenance operation. These XML-based tools give the customer control over their documents when changes occur and updates are necessary. InfoTrust Group has been servicing the aerospace industry for over 18 years and has a base of over 100 customers.

Mobideo's Guide™ is designed to provide aircraft mechanics with a simple, step-by-step breakdown of tasks. Maintenance personnel are equipped with rugged mobile devices, enabling both content provisioning and work assignment allocation. The system displays work cards, job guides, fault isolation manuals and part catalogs clearly and in a user-friendly interface. In addition, supervisors are continuously updated regarding work status, service progress, aircraft release and potential mechanical problems - in real-time, empowering managers with a bird's eye view of aircraft status and availability, at all times.

The two companies have already successfully demonstrated integration of InfoTrust Group's SkyView ML and Mobideo's Guide system. "The integration of these systems provides combat aircraft with unprecedented tools to efficiently and safely maintain aircraft," stated Godet. "This marks a significant advancement to the world of military aircraft maintenance data."

### **ABOUT MOBIDEO AEROSPACE**

Mobideo Aerospace is a leading provider of innovative, interactive mobile MRO (Maintenance Repair & Overhaul) knowledge systems for the Global Aviation maintenance market - reducing operational inefficiencies and increasing aircraft availability while improving safety and reliability with its flagship product Guide™.

The Company is a sister company of Mobideo Israel Ltd., a well established private company which specializes in mobile enterprise systems and premier products aimed at streamlining enterprise workforce processes. Mobideo Aerospace leverages Mobideo Israel's accumulated intellectual property in mobile application software, and utilizes its core technology infrastructure and business know-how. Established in 2000, Mobideo Israel maintains a diverse international customer base of over 100 enterprises and organizations.
