InfoTrust Group Opens New Subsidiary in Montreal, Canada
Enhanced Customer Support Through Expanded Global Presence

IRVINE, CA – October 5, 2009 – InfoTrust Group, Inc. (ITG) announced today the opening of its newest operation center based in Montreal, Canada. The result of continued customer demands, this location enables ITG to provide service and support to its growing number of customers in that region, as well as allows it to gain a strategic foothold in one of the world’s key aerospace and defense hubs.

“It is our mission to offer each customer top quality service without the hindrance of time differences, cultural distinction and language barriers, which is why Montreal was the logical choice for expanding our physical presence in North America, given its rich aerospace tradition, multilingual makeup, geographic proximity, and its status as an international city,” stated ITG President and CEO Geoffrey Godet.

The Montreal subsidiary will do business under the name Solutions Infotrust, Inc. Among other products and services, ITG’s operation in Montreal will offer a full range of engineering services such as technical writing, technical illustration, data conversion, and translation, as well as a dedicated business consulting practice. The Montreal team has been hired and it is fully operational and already in production.

The hallmark of ITG is to forge lasting relationships with its existing customers through focused and personalized service. With a base in Montreal, ITG is ideally situated to expand this value proposition to other areas within the Canadian province of Quebec, Ontario, Western Canada, and the Maritimes.

“This is an important and strategic expansion for our company,” stated Mr. Godet. “Canada, particularly Montreal, has a large aerospace and defense industry. We feel this will provide tremendous benefits and opportunities for us and allow local Montreal and Canadian-based OEMs, airlines, MROs, defense forces and defense organizations to profit from an operations center that is close to home and knowledgeable of their marketplace and specific needs.”

The Montreal operation marks the eighth ITG operation center around the globe. ITG offices are also located in Irvine, CA, Boulder, CO, Phoenix, AZ, Austin, TX, Shanghai, China, Rennes, France and Toulouse, France.

“Our goal is to offer to customers in all parts of the world our experience and extensive expertise in the aerospace and technical fields, along with the diverse strengths of our latest S1000D technology,” stated Geoffrey Godet. “We continue to raise the bar for ourselves on full service support to our customers both geographically and across multiple industry lines.”
