**InfoTrust Group awarded contract for  
Strategic Global Technical Publications Support & Delivery Program Initiative to  
Rolls-Royce plc**

*TechSight/X<sup>®</sup> Provides Full Service, End-to-End S1000D Solution*

IRVINE, CA – January 25, 2010 – InfoTrust Group announced today a contract award by Rolls-Royce to deliver and support a global technical publications solution.

Rolls-Royce initiated its Global Technical Publications Strategic Solution (GTPSS) program to facilitate common corporate processes and efficiencies including remote collaborative working, and to deliver data to current/emerging international technical document standards and customer requirements.

InfoTrust Group will be employing its innovative TechSight/X<sup>®</sup> products and services, complemented by some of the newest EMC platforms, and a recently expanded alliance with EMC Corporation. This provides the customer with a complete publication solution for authoring, managing, publishing and delivering data to its customer base, both externally and internally, in adherence with the latest S1000D specifications. TechSight/X utilizes throughout its architecture best of breed XML technologies such as xDB, EMC's powerful native XML database, and EMC's Documentum Enterprise Content Management platform that will afford Rolls-Royce maximum flexibility, performance and reuse of content, among other benefits.

This solution replaces and consolidates into TechSight/X all of the customer's existing technical publication systems acquired or developed over time. The project will convert, consolidate and manage all data from ATA, MilSpec, and older issues of S1000D into the latest issue of S1000D (4.x).

“The TechSight/X product is unique in that all data within the system is managed and authored according to the latest issue of S1000D, while it still provides the option to continue to import and publish ATA, MilSpec and legacy S1000D data in their native formats,” stated Geoffrey Godet, InfoTrust Group President and CEO. “The selection of this technology by Rolls-Royce is another significant step for InfoTrust Group towards being the worldwide leader in XML management solutions.”

“We are pleased that Rolls-Royce has selected InfoTrust Group to help them meet the unique challenges presented by consolidating the management of all technical publications, delivering this content to tens of thousands of internal and external users,” stated Geoffrey Godet. “The combination of our experience, expertise and proven software tools and services will provide a perfect fit for the customer's short-term and long-term objectives within their new service-based business model.”

## **ABOUT INFOTRUST GROUP**

InfoTrust Group has been a recognized leader in the Aerospace, Defense, Manufacturing, Automotive, High-Tech, Publishing and Health Care industries for more than 25 years. Today, our unique global approach is based on an in-depth knowledge of content, data and standards such as XML, SGML, S1000D, DITA, ATA and Military Standards.
