InfoTrust Selected to Provide Consulting Services to Transport Canada

Irvine, CA, April 28, 2009 – InfoTrust Group is pleased to announce that it has been selected to provide consulting services to the Aircraft Services Directorate (ASD) of Transport Canada. InfoTrust has been engaged by Transport Canada through a Standing Offer arrangement to provide, on an as required basis, services that relate to the ASD’s aircraft operational and maintenance environment.

The awarding of this Standing Offer follows the successful completion by InfoTrust of an earlier contract for a preliminary study of the ASD’s operating environment and the state of its technical data, which culminated with a set of recommendations aimed at improving the ASD’s maintenance and operational capabilities.

“As Transport Canada proceeds with its efforts to improve aircraft configuration management, maintenance planning, and inventory management, we are pleased that they turned to InfoTrust to analyze and document their data and processes and provide them with this strategic foundation,” stated Geoffrey Godet, CEO, InfoTrust Group.

InfoTrust provides services such as analysis of current business flows and processes, identification of opportunities and methods to obtain improved efficiencies, analysis of proposed changes with respect to costs and benefits and impacts to business lines, development of recommended courses of action, including implementation strategies, and provision of project management and implementation services.

“We are confident that we can help ASD achieve profound productivity gains and improvements in their maintenance environment,” continued Godet. “Airlines and operators around the globe, each with unique aircraft maintenance environments, have relied on InfoTrust’s solutions and services, realizing a significant increase in the efficiency of their business practices.”

“The success of our software solution in the marketplace is tied to our extensive knowledge of aviation operations and maintenance and how technical data is used in those functions. It is this knowledge base that allows us to provide business consulting services to customers like Transport Canada,” stated Godet.

ABOUT INFOTRUST GROUP’S AEROSPACE BUSINESS

InfoTrust provides technical data management solutions and associated services to the aerospace industry. InfoTrust’s “SkySuite” product provides an end-to-end solution to meet the technical data processing, conversion, authoring, content management, change management, publishing and distribution needs of

aircraft operators and aerospace manufacturers. In addition to software design and implementation, InfoTrust has the domain expertise necessary to assure the successful delivery of solutions to meet the unique demands of the aerospace industry. The InfoTrust team includes experts in aviation operations and maintenance, international data standards (S1000D, ATA, DITA, Military) and digital documentation standards (SGML, XML, HTML).

ABOUT INFOTRUST GROUP

InfoTrust Group has been a key player in the aerospace, defense, manufacturing, automotive, high-tech, publishing and health care industries for more than 25 years. Today, our unique global approach is based on an in-depth knowledge of content, data and standards such as XML, SGML, S1000D, DITA, ATA and Mil Spec. We deliver powerful documentation solutions to over 100 companies for their information processing, conversion, authoring, content management, change management, publishing and distribution objectives. InfoTrust Group's wide range of end-to-end solutions provides a strong return on investment that increases productivity and produces more accurate and reliable information.
