**Jouve Data Management Acquires InfoTrust**

IRVINE, CA – December 4, 2007 – Jouve Data Management, Inc. (JDM) also known as Jouve Aviation Solutions announced today that they have completed the acquisition of InfoTrust Corporation, creating a global organization that will provide an expansive array of product and service offerings for technical document and content management solutions within the aerospace industry and beyond. The combined company name is InfoTrust Group and is headquartered in Irvine, California.

“It made perfect sense to combine these two companies with complementing products and service offerings,” stated JDM President and CEO Geoffrey Godet. “The value to each organization became clearly visible during the due diligence process, manifesting such benefits as increased stability and reliability for our operations and our customers. It became clear to us that this acquisition would help both entities better respond to the growth we were each experiencing in terms of customer base and product offerings.”

“For example, in the airline industry,” continued Godet, “JDM and InfoTrust together currently support the most successful major manufacturers, airlines, cargo carriers, MROs and low cost airlines in the world -- specifically in the U.S. where their combined customer list includes the top 10 commercial airlines and the top three cargo carriers.” Both companies have recently signed significant new business.

“This acquisition embodies the full value of the vast experience of these two companies. We are excited about the exponential increase in capabilities across our common core competencies. Our customers will realize the full benefit of even deeper domain expertise, stronger technical expertise and wider industry expertise,” stated Godet. “By combining these companies, we are now able to offer our customers an even more powerful and diverse solution set, stronger project management, increased depth in professional services and superior customer support.”

Leveraging the strengths of established partnerships with companies such as [EMC](#), [Mark Logic](#), [Just Systems](#), [Mobideo](#) and [Adobe](#) has also shown to be a valuable benefit to the larger operation. Such alliances will help augment existing development efforts as well as provide additional capacity for new development.

## **ABOUT INFOTRUST GROUP**

InfoTrust Group's business strategy and vision are focused on one common goal -- *to be the most customer oriented provider of leading application technologies and services for publishing and content management needs*. InfoTrust Group offers optimum customer satisfaction through a global support network of seven locations across the U.S., Europe and Asia to ensure your success by maintaining 24/7 customer service and support. We deliver powerful documentation solutions to over 100 companies in the following industries: Aerospace, Defense, Manufacturing, Automotive, High-Tech, Publishing and Health Care.

InfoTrust Group (formerly Jouve Aviation Solutions) has been a key player in the information processing industry for more than 25 years. Today, our unique global approach is based on an in-depth knowledge of content and data. We offer complete solutions for all information processing, conversion, authoring, change management, publishing and distribution objectives. InfoTrust Group provides leading expertise in technologies such as XML, e-commerce, Java, and object and relational storage as well as experienced consulting, program management, systems integration, software engineering and solutions development services. InfoTrust Group's wide range of end-to-end solutions offer a strong ROI by providing electronic content management solutions that increase productivity by taking advantage of XML capabilities and content reuse, and that produce more accurate and reliable information for compliancy. Our products and services are designed to function in concert with each customer's individual needs and requirements to help manage your structured and unstructured information into useful knowledge.
